Of these cooking places the simplest and most economical as to fuel is in the form of a trench dug in the ground. HOT SPRINGS IN UGANDA. Interesting Report of Their Working

The following is an interesting story concerning the hot springs at Ruwenzorl, In the Uganda, as related by Bishop Tucker:

Unable to sleep, we lay perspiring as if we were in a Turkish bath. Next morning we spent in laspecting the wonderful hot springs which lay about one hour away to the left. The boiling water was bubbling up all over a space of about 100 yards. Down the center is a channel in which the hot water collects and runs away, forming a good-sized atream as it gets free of

the spriags. "We found a number of people bath-Sag at the time, as they believe the water is a sure cure for almost every disease. We placed a few potatoes in one of the largest aprings and had the pleasure of eating them, beautifully boiled, in about ten minutes, 1 nm told that the natives living round here holl their potatoes here every day, and are thus sared firewood and water. The bathers have their bath by diverting one of the hot streams in a large hole dug in the ground.
